

Astrolok AI Knowledgebase — Module 08

Topic: Transits & Annual Predictions (Gochar & Varshphal)

■ Gochar (Transit) Fundamentals

- Transits show current planetary movements and how they affect the natal chart. - Major transits to track: Saturn (2.5 years), Jupiter (1 year), Rahu/Ketu (1.5 years) - Fast transits (Sun, Moon, Mars, Mercury, Venus) impact emotions and daily life.

■ Transit-Based Interpretation Rules

- IF Saturn transits 4th from Moon → emotional burden, relocation, pressure - IF Jupiter transits 2nd or 5th from Moon → wealth, expansion, learning - IF Rahu transits Lagna → identity crisis or obsession - IF Mars transits 8th house → accidents, anger, health flare-ups

■ Sade Sati & Dhaiya

- Sade Sati: Saturn transiting 12th, 1st, 2nd from Moon sign (~7.5 years) - First Phase: Financial instability or relocation - Second Phase: Mental pressure, career issues - Third Phase: Maturity, emotional grounding - Dhaiya: 4th and 8th transit of Saturn → emotional or physical stress

■ Varshphal (Annual Chart)

- Varshphal is the solar return chart (when Sun returns to exact natal position) - Constructed yearly, reveals major events for that year - Muntha: special point of energy in the year — where it lands is crucial - Tajik aspects used in Varshphal differ from standard aspects

■ Key Varshphal Concepts

- Muntha in 6/8/12 → struggles in that year - Muntha with benefic → gains and ease - Year Lord (Varshesh): planet ruling the year - Saham Points: special sensitive degrees like Punya, Rajya, etc.

■ AI Logic for Transits & Yearly Predictions

- Match transit planet position with natal planet to assess effects - Check Saturn, Jupiter, Rahu for slow and long-term change - Combine Dasha + Transit + Bhava to time events - Use Varshphal for short-term (1 year) validation - IF Muntha in 8th + Saturn aspect → suggest caution year
