

# Astrolok AI Knowledgebase — Module 01

Topic: Understanding Jyotish, Karma, and Graha Logic

## ■ Core Concepts

- Jyotish = Jyoti (light) + Ish (divine) → “Light of God”
- Jyotish reveals the influence of planetary energies (Grahas) on human life.
- It is both a science of time and a spiritual lens to understand karmic patterns.
- Sanskrit names (e.g., Shani, Surya) must be used for energetic connection.
- The astrologer (Jyotishi) is a Daivagna — one who perceives divine timing.

Types of Karma:

- Sanchit: Accumulated karmas from past births.
- Prarabdha: Fixed karmas being experienced in current life.
- Kriyaman: Karmas created in this life, affecting current/future events.
- Agami: Future karmas shaped by present actions.

## ■ Interpretation Rules

- IF Moon is afflicted by Rahu → emotional turbulence & confusion.
- IF Saturn aspects Lagna → maturity through hardship.
- IF Sun is weak + combust → weak willpower and recognition delays.
- IF Venus is retrograde + in 6th → strained love or reproductive issues.
